In the classic style of For Dummies, everything is explained in the very important language of understanding, with a lot of illustrations to help clarify any confusion. In summary, what you have in your hands is the paper version of an in -depth photography workshop specifically adapted to your canon images power home. Whether your interests lie in taking family photos, exploring nature and traveling the photograph, or opening photos of products for your business, you will get the information you need to capture the images that you imagine. A loud glance what is Ahead this book is organized in four parts, each dedicated to a different aspect of the use of its maid. Although the chapters flow in a sequence that is designed to take absolute beginners to experienced users, we also try to make each chapter the most independent possible so that you can explore the issues that interest you in any order what you wish. Here there is a loud look at what you can find in each part: Check.png Part I: Fast Track to Super Snaps: This part contains four chapters that help you get up and run with your rebel T3/1100D. Chapter 1 offers a brief general vision of the Cages controls and guides him through the initial configuration and personalization steps. Chapter 2 explains the basic options for taking images, such as the mode of obturing liberation and the image quality configuration, and Chapter 3 shows how to use the simple exposure modes of the Cã Mara, including Full Auto and Creative Auto. Chapter 4 explains the entrances and exits of the use of Live View, the characteristic that allows you to compose images in the monitor, and also covers the recording of ed ed senegÃmi ed aicnerefsnart ed osecorp led s©Ãvart a aÃug el 6 olutÃpaC le y ,senegÃmi ed n³Ãiccudorper ed sacitsÃretcarac sal acilpxe 5 olutÃpaC .aÃfargotof al a seroiretsop samet etucsid etrap atse ,acilpmi olutÃt us omoC :senegÃmi ed sovihcra noc odnajabarT :II etraP gnp.kcehc orgilep ed anoz anu acidnI .adiv noc arim ,onoci etse saev odnauC spe.c4_gninraw gnp.kcehc .etnaimerpa ohceh orto rop airomem ase ed odazalpsed odis rebah edeup euq ohceh nu elradrocer o orberec us ed ozalp ogral a airomem al ne ranecamla anep al etnemlaicepse elav euq n³Ãicamrofni acatsed onoci etsE spe.c4_rebmemer gnp.kcehc :sonoci ed rodacifidoced ollina oiporp us ¡Ãtse Ãuqa ,on iS .senegr¡Ãm sus naroced euq sodnoder sonoci sednarg sol noc odazirailimaf ratse sedeup ,seimmuD araP orbil remirp ut se on etse iS atneuc ne renet a sasoc sarto y sonocI .sobma ed ocop nu o ,senoisaco ne selitºÃ ,setnaseretni nos etnatsbo on ,D0011/3T lebeR ed satsil sim ©Ãrpmoc euq senozar serojem 01 sal ed aÃroyam al ne artneucne es on euqnua ,euq aram¡Ãc al ed sacitsÃretcarac sal ed n³Ãisiver anu noc orbil le arreic 11 olutÃpac lE .aram¡Ãc ut noc odanoicroporp otiutarg erawtfos le odnasu satcefrep euq sonem seneg¡Ãmi ralgerra om³Ãc artseum et 01 olutÃpac lE .sojesnoc y n³Ãicamrofni ed selanoicida stib neneitnoc euq seroirepus satsil sod noc eyulcnoc orbil le ,seimmuD roF ed n³Ãicidart asomaf al nE :szeiD sol ed etraP aL :VI etraP gnp.kcehc .s¡Ãm y sotneimacreca ,sejasiap ed sanecse ,n³Ãicca ed samot ,sotarter :seneg¡Ãmi ed socifÃcepse sopit arap sodatluser serojem sol necudorp euq orit ed saigetartse y aram¡Ãc al ed n³Ãicarugifnoc al a adip¡Ãr aicnerefer ed aÃug anu noc etrap al evleuvne 9 olutÃpac lE .roloc le y euqofne le ralupinam arap sojesnoc ecerfo 8 olutÃpaC le y ,etnatropmi odot n³Ãicisopxe ed amet le erbuc 7 olutÃpaC lE .launam o acit¡Ãmotuaimes aÃfargotof ed sodom ne esodn©Ãivom aram¡Ãc us ed otelpmoc ovitaerc redop le ratased a naduya el etrap atse ed solutÃpac soL :ovitaerc lortnoc ed amoT :II etraP gnp.kcehc .5 olutÃpaC ne radn¡Ãtse otamrof nu a)2RC(waR nonaC ovihcra ed otamrof le ne sadamot seneg¡Ãmi ed n³Ãisrevnoc al noc aduya renetbo edeup n©ÃibmaT .aenÃl ne ritrapmoc y rimirpmi arap satsil seneg¡Ãmi riugesnoc ogeul y arodatupmoc us a aram¡Ãc that can lead to many waves and teeth thread if ignored. Check.png Technicalstuff_4C.EPS A lot all. But if we present a detail that is mainly to impress your Geeky friends, we mark it with this icon. Check.png Tip_4C.EPS An Information Punta icon that saves time, effort, money or other valuable resource, including your sanity. In addition, we need some other details that will help you use this book: Check.png Another Mérgen art: The rivers of some of the buttons of your mail and graphic on screen also © n appear in the minors of some pages and in some tables. Let us include these images to provide unpacking reminders of the appearance of the boton or option that is being discussed. Check.png Men's Software Commands: In sections that cover the software, a series of words connected by an arrow indicates commands that choose in the program menages. For example, if one step tells you, choose Fileâ ‡ 'export, click on the Menãº File to disable it and then click the Export in the Menãº. Check.png firmware of CÃ¡mara: firmware is the internal software that controls many of its operations. This book was written using version 1.0.4 of the firmware, which was the current most at the time of publication. From time to time, Canon releases firmware updates, and you must check its website (www.canon.com) periodically to find out if there are available updates. (Chapter 1 tells him how to determine what firmware is running for his cathex. About the Shown program in this book in capitles that cover the download and editing of images, we show you how to do things using the free canon software that is sent on one of the two CDs in your Cámara box. (The other CD contains electronic software manuals.) Have the However, that the tools used in these programs work similarly in other programs, so it should be able to easily adaptA Neve Ebyam Ro keew ni ,kceh ,ro â€â€ã¢'s noonretfa Etelpmoc nac uoy ksat tâ€â€' kcart tsaf i trap .Troppusthcet/Moc.yeliw.www because tropepus lacinhcet tcudorp yyelop tcatnnoc osla nac uos .3993-275-713 llac elp ,tatats detu ,492-2 yna gnimreted Elbuort Evah uoy fi .secived redaere lla when ylrepop yam yam koobe siht of Desu Slobmys laiceps emos taht etont eseaelp .sediug wedug tahres ot , ,ko ,su gnowohohohh tcefrep eht d0011/3t leber ruoy .Koob siht fo tser eht gniolpxe trats neht dna dar uoy elihw stopi ot uoy the revetahw Foc that dna dna arecay barg barg ottruf s. erutpac ot sgnittes yrassecen eht ni gnilaid ,orp a ekel areyac ruoy dleiw noos llâ€â€â€â¢â ¢uoy ,Ecitcarp DNA ,Ecneitap ,Empneitap ,eit eemos htiw .eriotreper ruoy ot tlicks gnitoohs erom owt ro and dnorop tniam ,gnituo otohp that if og osreve , htitnemirepxe ,ylwols of ekat .tilgggob-dnim elttil elttil sht sdnif enoyfmoc doog yrev yrev ew ,elbmaerp siht pu parw oT !nuF evaH dna ,tneitaP eB ,ecitcarP .uoy htiw koob siht yrrac ot tnaw tÃÃÃ¢nod uoy nehw semit rof gab aremac ruoy ni ti kcut dna ,tuo ti tnirp ,no goL . aremac ruoy no sedom erusopxe dna ,sehctiws ,slaid ,snottub eht lla ot ediug ecnerefer-kciuq a sniatnoc teehS taehC ehT .d00113tlebersoenonac/teehstaehc/moc.seimmud.www ta teehS taehC seimmuD roF suomaf eht fo noisrev cinortcele na dnif nac uoy ,sunob Dedda elttil teehs taehce .esu uoy erawtfos revetahw ot spets le ne ymmahw-elbod nu ed ogla ordneibicer ¡Ãtse detsu ,latigid aram¡Ãc aremirp us omoc RLS remirp us otnat se D0011/3T lebeR le iS .omsim Ãs ne osap narg nu ,aram¡Ãc anu ne etnel anu odaibmac sayah euq zev aremirp al res edeup atse ,kceH .sacin¡Ãcem salihcom y ,DCL sºÃnem ,senotob ,senotob soveun ed acarrab anu eneiv n³Ãicidnuf ed dadicapac aveun ase noc otnuj orep ,)RLS latigiD(RLSd ut noc saveun sasoc sahcum recah s¡Ãrdop ,oralC .dadeisna ed ocop nu noc odalpmet odunem a se otneimivom led n³Ãicome al ,otneimicerc ed n³Ãicalumitse reiuqlauc noc euq laugi lA .)olitse ed etnel ed n³Ãixelfer(RLS oledom nu a rarapsid y otnup nu ed esrevom acifingis aires aram¡Ãc aremirp us riugesnoc ,sanosrep sahcum araP odip¡Ãr lortnoC y sorapsid ed n³ÃicarugifnoC ahcelf al odnasU sºÃnem ed ahcelf ed senoicpo enoicceleS ahcelf sonretxe aram¡Ãc ed selortnoc noc reconoC aram¡Ãc al ed airomem ed satejrat ed ahcelf noc rajabarT rosiv led euqofne ed ahcelf al ed etsujA RLS etnel ed ahcelf anu rasu y ratnujdA olutÃpaC ed ahcelf atsE nI fit.1010oc-6794908111879 arreiT al ed yaL le odneiugisnoC 1 retpahCfit.1010ab-6794908111879fit.4010pp-6794908111879fit.3010pp-6794908111879fit.2010pp-6794908111879 .aram¡Ãc us ed enic y oviv ne n³Ãicazilausiv ed senoicnuf sal razilitu om³Ãc nartseum el y n³Ãicisopxe ed odom reiuqlauc ne ogeuj ne nartne euq seneg¡Ãmi ed amot ed setsuja sonugla nacilpxe etrap atse ed solutÃpac sol ,s¡ÃmedA .selaid y senotob ,aram¡Ãc ed sºÃnem sol noc esrazirailimaf y atsiv us a rosiv le ratsuja omoc ,n³Ãicarugifnoc ed socis¡Ãb sosap sonugla adroba n©Ãibmat y aram¡Ãc us ed socit¡Ãmotua s¡Ãm aÃfargotof ed sodom sol omix¡Ãm la rahcevorpa om³Ãc artseum el etrap atsE .s¡Ãmed ol odot isac ed agracne es aram¡Ãc al y ,anecse al renopmoc se secah euq ol odoT .ozreufse ocop yum noc sacits¡Ãtnaf seneg¡Ãmi rarutpac edeup ,aram¡Ãc us ed sorapsid y sotnup ed n³Ãicisopxe ed sodom sol ed osu le etnaideM .yoh otcepsa narg ed sotof ramot sadeup on euq acifingis on ose oreP of New Stuff. But do not fear: with a certain practice and the help of this chapter, which introduces introduces To each external control, we explain in simple language how to adjust the configuration of the CÃ¡mara and offer advice on some configuration options. You will feel about your new cupinity. Comfortable with your lenses One of the biggest differences between a leader pointer and a Cámara slr is the lens. With a slr, you can change lenses to adapt to different photographic needs, moving from an extreme closing lens to a superlargo telephoto, for example. In addition, a SLR lens has a minimum approach ring that allows you to concentrate manually instead of depending on the automatic focus mechanism of the CÃ¡mara. Even this basic difference extends its opportunities for creation of images in large ways. Of course, these aggregate capabilities mean that you need a little background information to fully take your lens. To do this, the following sections explain the process of coupling, elimination and use of this critical part of your cages. Attach a lens your catheter accepts two categories of canon lenses: those that have an EF-S design and those that have a simple efficiency. Technicalstuff_4c.eps The EF represents the electronic approach; The S, for the short back approach. And that simply means that the rear element of the lens is more close to the sensor than with an EF lens. And no, you don't need to remember what abbreviation means. Since it was assured that if you buy a canon lens apart from the one sold with the Cámara, it carries the EF-S EF-S. You get the best end of this agreement because the T3/1100D is compatible with both new types of canon lenses, while the CasMaras compatible with EF only can adapt to the EF type lenses. If you want to buy a non -canal lens, see the website of the lens manufacturer to find out what lenses work with the rebel T3/1100D. Whatever the objective you choose, follow these To attach it to the body of the manelet: 1. If you no longer have an attached lens, remove the lid that covers the mount of the lens in the front of the the I don't know. #### ## I'm not sure.Example, it's not a good idea. For greater safety, point to the body of the camera slightly downwards when performing this manoeuvre. Doing it helps to prevent any Flotsam in the air from being attracted to the camera by gravity. Removing a lens to separate a lens from the body from the camera, take these steps: 1. Locate the lens release button at the front of the camera, labeled in Figure 1-2. 2. Grab the rear necklace from the lens. In other words, attach to the stationary part of the lens that is closer to the body of the camera. 3. Press the lens release button while removing the lens release button lens (in the anti-horn sense). You can feel the lens release from the support at this point. Lift the support lens to remove it. 4. Place the rear protective cover at the back of the lens. If you are not placing another lens on the camera, cover the lens support with the protective cap that also came with your camera. These steps help keep your lens and camera dustless. Using an IS lens (image stabilizer) of the 18 mm lens sold with the Rebel T3/1100D camera offers image stabilization. In the Canon lenses, this feature is indicated by the initials is in the name of the lens. The image stabilization tries to compensate for small amounts of chamber smoothing that are common when photographers handle their cameras and use a slow shutdown speed, a lens with a long focal distance or both. Camera smoothing is a problem because it can cause blurry images, even when your focus is dead. Although image stabilization cannot work miracles, it does allow most people to capture sharper hand shots in many situations that otherwise could not. Warning_4c.eps When using a tripod, theof the image can have harmful effects because the system can try to adjust the movement that is not really happening. Although this problem should not be a problem with most canon is lenses, if you see blurry images while using a tripod, try to set the stabilizer stabilizer (shown in Figure 1-3) to Off. You also can save battery power by turning off image stabilization when you use a tripod. If you use a monopod, leave image stabilization turned on so that it can help compensate for any accidental movement of the monopod. (Julie never can keep those things perfectly still, no matter how hard she tries ¢ÃÂÂ but then again, she drinks way too much coffee.) If you use a non-Canon lens, the image stabilization feature may go by another name: anti-shake, vibration compensation, and so on. In some cases, the manufacturers may recommend that you leave the system turned on or select a special setting when you use a tripod, so be sure to check the lens manual for information. remember_4c.eps Whatever type of lens you use, image stabilization isn¢ÃÂÂt meant to eliminate the blur that can occur when your subject moves during the exposure. That problem is related to shutter speed, a topic you can explore in Chapter 7. Chapter 8 offers more tips for blur-free shots and explains focal length and its effect on your pictures. Shifting from autofocus to manual focus Your Rebel T3/1100D offers an excellent autofocusing system, which you can find out how to exploit to its best advantage in Chapter 8. However, with some subjects (such as low-contrast scenes, like foggy mornings), autofocusing can be slow or impossible, which is why your camera also offers manual focusing. Make the shift from auto to manual focus as follows: 1. Set the AF/MF switch on the side of the lens to the MF position. This switch sets the focus operation to either auto (AF) or manual (MF). Figure 1-3 shows you the switch as it appears on the Rebel T3/1100D kit lens. The switch should be in a similar location on other Canon lenses. If you use a lens from another manufacturer, check the lens instruction manual. Figure 1-3: Image Stabilization can help ensure sharper handheld shots. 2. Look through the viewfinder and twist the focusing Until your subject focuses. 9781118094976-FG0103.Epon the kit lens, the focus ring is at the end remotely away from the lens barrel, as indicated in Figure 1-3. If you use another lens, the focus ring can be located elsewhere, so check the lens manual. If you have problems concentrating, you can be too close to your subject; Each lens has a minimum approach distance. (For the kit lens, the minimum closed approach range is approximately 10 inches; for other lenses, check the specifications in the lens manual). You may also need to adjust the viewfinder to accommodate your view; See the following section for more details. Tip_4C.EPS Some lenses allow you to use the automatic approach to establish the initial focus and then adjust the approach manually. See the lens manual for information on how to use this option, if available. (This option is not offered in the kit lens). Harassing and leaving if you bought a zoom lens, it has a móvil zoom ring. In the kit lens, the zoom ring is detrimental to the focus ring, as shown in Figure 1-3, but again, the relative positioning of the two components depends on their lens. With the kit lens, turn the zoom lens barrel. Some zoom lenses use a thrust movement for zoom instead. The number around the edge of the zoom ring, by the way, represent focal distances. Chapter 8 explains the focal distances in detail. Meanwhile, keep in mind that when the lens is mounted on the Cãman, the number that is aligned with the white focal length indicator, labeled in Figure 1-3, represents the current focal distance. In Figure 1-3, for example, the focal distance is 28 mm. Adjust the approach of the perched viewer on the upper right edge of the viewfinder there is a Black knob, labeled in Figure 1-4. Officially known as dialing adjustment control, this knob allows you to adjust the increase in the viewfinder to combine with your view. Figure 1-4: Enrolle the small knob to configure the viewer approach for your view. view. tâ€â€ânod .tcepser dna htiw of taert ,ydrus ylbanosaer rotinum hguohtla .The tcetorp gnp.kcehc :spit detail-rotam Ã¢taht ,hseehS .stide eivom dna otohp yratnemidur mrofrep ot dna ,kcabyalp eivom dna otohp hctaw ot ,sgnittes aremac kcehc ot ,sedom eivoM dna weiV eviL ni rednifweiv a sa ,sgnittes aremac lortnoc ,noitamrofni gnitoohs weiver ,metsys unem evisnetxe sÃ â€â€âEmpec eht eht eht eht eht eht ot ot the .EcIved lortnoc dna yalpsid , noitcnufitlum that in sevres ,5-1 E´wohs and .aremac Eht Fo Kcab Eht eht eht eht eht eht
